The *2019* Benchmark Collection

Cobalt Boats of Neodesha, KS

Honor. Passion. Pride.

From our beginning in 1968 to this day, Cobalt Boats remains steadfast in a tradition of individualism, the pride of people with extraordinary skills set among a small town's uncompromising notion of what might be. We know these people, the neighbors who come every morning to build these boats. We know their grandparents and their grandkids, second and third generations of families crafting over five decades of Cobalts. These are rooted people, solid in a work ethic born on farms and ranches, people who understand at first-hand the ways in which personal accountability serves collective achievement. People who grew up together in small towns with big ideas. People with a sense of place. And of purpose.

This team behind Cobalt design and Cobalt manufacturing, still refuse ever to admit that good enough is good enough. We build boats on the premise that, in all our work in Neodesha, no one job is more important than another. As Cobalt has grown to a company of over 600 associates, we try very hard to perpetuate the genuine sense of family that has characterized our interactions with each other from the very beginning.

Cobalts come from a place where technology contributes in measurable ways to every component of a Cobalt's construction, a place where – in ways beyond measure – individual effort and personal integrity have refined the boat-builder's art for over 50 years of ever more sophisticated design.

And so again tomorrow we will do our part to nourish the unspoken trust which underpins our relationships with Cobalt dealers, with Cobalt associates and, of course, with the remarkable people who own Cobalts.

In a place where a handshake is sufficient to the sealing of a dream.

Inspired Innovations

Who can say when first you heard the open water speak, when the dream began. To this day, can you report the moment? Try now. Reach back and listen to that faint call.

At Cobalt, we build boats that answer the call. It is a relationship like no other – owners and their boats. It is that first grip at the helm that releases a sense of assurance down the spine. At that very moment...a promise is made. With each ride, with each cruise comes conversation, laughter and pure enjoyment afloat. At that very moment, a bond is formed on trust, a type of trust that feels like family. And with that trust arises a certain lifestyle, an opportunity for families to come together and enjoy what life is truly about. It is a type of confidence that only a Cobalt can instill in its owner.

From this relationship comes innovation inspired by our customers. Take the Cobalt's swim platforms for example – large, welcoming and safe, suspended just above the waterline for easy use in all water-born activities. Oversized, polished stainless steel tubing wraps every platform to protect the boat when docking. Cobalt's exclusive and patented swim step requires only two easy flips: down to use, back to stow. The swim step makes boarding your Cobalt a breeze, and provides a perfectly cool resting area.

Over five decades, Cobalt has been first in bringing innovative functionality to the marketplace. Time and time again, other marine manufacturers have seen fit to copy the thoughtful design that has always defined our boats.

- ☞ Cobalt's extended running surface for quicker planing, firm and true turns, minimized bow rise, and greater lift at the stern.
- ☞ Flip-lip seat bolster – the ability to sit higher, with unobstructed views above the windshield.
- ☞ Integrated bow eye scuff plate.
- ☞ First stern drive to feature the walk-thru transom.
- ☞ Quick-release fender clips for perfect placement and quick deployment.
- ☞ Windshield latch, holding the door securely open.

Finely Detailed Interiors

The technical word is “interface,” those sensory exchanges between boat and owner, those points of contact so fundamental to the enjoyment of a day on the water, so critical to the determination of a boat’s long-term value. Glance at any cockpit and witness the full effect of a Cobalt interior – straight, smooth, uniform, and very good looking. Better yet, cruise a Cobalt at first opportunity for some meaningful, memorable interfacing of your own.

Start at the helm, where strength meets stylish strength. Rock-solid fiberglass substructure rides beneath upholstered good looks, as optional Ebony Macassar trim adorns the helm’s metal panels. The Cobalt Glass Cockpit touch-screens for a level of control and information borrowed from aircraft designers. Stainless steel switch mechanisms are firm, sure, and sturdy.

Cobalt upholstery involves the fingers. Butter-soft and bull-strong, as tactile as they’re easy on the eye, always double-fastened with both adhesives and staples, and stitched with meticulous precision. Underfoot, the carpet, Seagrass flooring, or Sof-Trac marine mats snap-out, rubber-backed, backed again with skid resistant no-flex composite flooring under all.

- ☞ Cobalt Glass Cockpit with touch screen displays.
- ☞ Precision-sewn interior details.
- ☞ Seats that convert to a sun lounge.
- ☞ Deep bow and cockpit seating.
- ☞ The warmth and feel of premium materials.
- ☞ A hand-crafted helm with detailed double-stitching.
- ☞ Ebony Macassar trim.
- ☞ Aircraft-inspired stainless switches.
- ☞ Cushioned storage lids with double-knuckled hinges to hold the lids open for easy access to the compartment below.

Saddle interior color shown.

Exceptional Methods of Construction

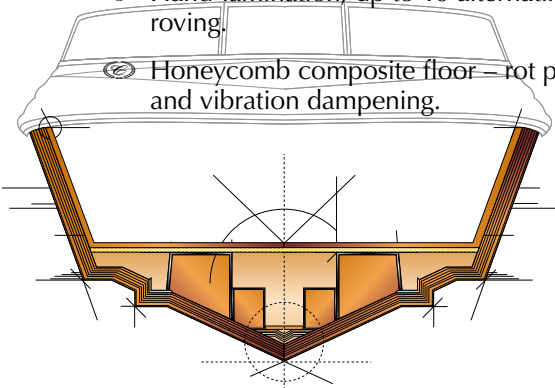

At Cobalt the hull means hand-work, with every layer rolled by skilled craftspeople. Eight layers altogether on the hull bottom, overlapped at the keel for a full sixteen layers. Reinforced with Kevlar® and then strengthened again with Spraycore®, the hull's structure hardens into the critical component of the legendary Cobalt ride

The quality of the mold equals the quality of the finish, and so hand-waxing follows after every other part. Old finishes are reworked after every ten parts. No power buffers are allowed, and therefore no unsightly marks or patterns are left behind. And because time in the mold ensures integrity, flexible strength, and year-to-year dependability, the long hours spent in the mold matter even more. Every Cobalt hull cures well beyond normal industry standards.

Cobalt longevity is obvious, some of the reasons why less so. Invisible composites, light and strong, compose every Cobalt transom. No wood there, not in that all-important force field. No wood either in the polypropylene structural honeycomb of the floor. Nor in the all-fiberglass stringers where a methacrylate bonding compound adds lifelong permanence. No wood in the water-impervious seat bases.

- ☞ Z-Thane™ strengthening, protective barrier coat in the hull.
- ☞ Completely hand-laid hulls, reinforced with Kevlar™.
- ☞ Composite construction on all structural components.
- ☞ Exceptional hardware, largely stainless, over-sized, over-strong.
- ☞ Graphics deep and strong in the gelcoat.
- ☞ Integrated bow eye with a scuff-plate for added protection.
- ☞ Hand-lamination, up to 16 alternating layers of fiberglass mat and woven roving.
- ☞ Honeycomb composite floor – rot proof strength with improved sound and vibration dampening.

10 SERIES

Value is defined as the ratio of utility to price. Or are you searching for something more? Enter the Cobalt 10 Series – a collection of boats that bring the same engineering, the same design philosophy, the same “Compromise Nothing” approach to construction as the larger Cobalts. With walk-about, lay-about,

stow-away spaciousness at every turn, the 10 Series creates their own sort of comfort and luxury in a more manageable size boat. Explosive hole-shots, tight high-speed turns and smooth fast long runs prove relentless excellence has no finish line.

200s

220s

cs22

cs23

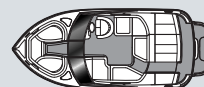

200s

Obsessed with details.

The 200S will show you nuances of design and construction once thought possible only in far larger boats. For example, the passenger seat can be positioned in a traditional forward-facing manner, then quickly and easily flipped down to an arena-style arrangement. The sunpad features an aft facing rumble seat. Shown here, the Tahoe Grey interior with standard carpet plus the Sof-Trac marine mat on the swim platform.

200s

10 SERIES

Length Overall: 20' 10" (6.35 m) • Beam: 8' 4" (2.54 m) • Dry Weight: 3500 lbs. (1588 kg) • Capacity: 11 persons

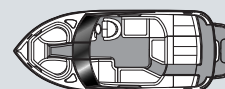

220s

A once-in-a-lifetime
experience. Every time.

The 220S makes idealized use of every square inch of its wide and sturdy stance. Here seating layout is key to the easy accommodation of guests and their gear. A co-captain seat position that can face forward or convert to face aft. Astern, the swim platform features the Cobalt Exclusive Swim Step and Sof-Trac marine mat. Above, the Tahoe Grey interior color selection with the standard snap-in carpet.

220s

10 SERIES

Length Overall: 22' 10" (6.96 m) • Beam: 8' 6" (2.59 m) • Dry Weight: 3700 lbs. (1678 kg) • Capacity: 12 persons

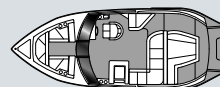

CS22

A boat that defines
the destination.

The CS22 serves as a reflection of your good judgment, your understanding of exactly where you've always wanted to go. Arrive in the widest cockpit space of any 22 footer, exactly detailed – color accented swim platform extensions, a walk-thru transom, Cobalt-branded side panels, and massive storage space. Even the engine compartment opens to full-width access. Shown here with the Tahoe Grey interior and standard snap-in carpet.

cs22

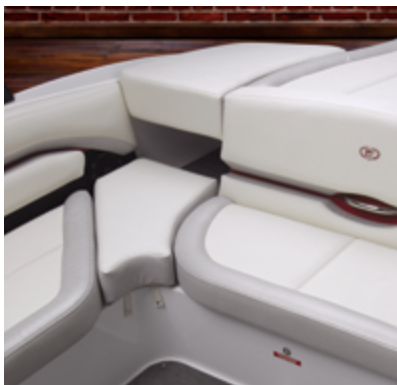

10 SERIES

Length Overall: 22' 6" (6.86 m) • Beam: 8' 6" (2.59 m) • Dry Weight: 3400 lbs. (1542 kg) • Capacity: 11 persons

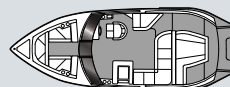

CS23

Elevate your experience.

There is something special about this one. Maybe it is because the CS23 comes from legendary Cobalt DNA – the smooth lines and timeless good looks, an ease of control and function, the widest 23 footer cockpit to be found. Features shown include optional transom filler cushions and Sof-Trac marine mat. Not to mention the standard equipped Flip-Down Swim Step at the platform. Shown in the Titanium interior and standard carpet.

CS23

10 SERIES

Length Overall: 23' 8" (7.21 m) • Beam: 8' 6" (2.59 m) • Dry Weight: 3700 lbs. (1678 kg) • Capacity: 12 persons

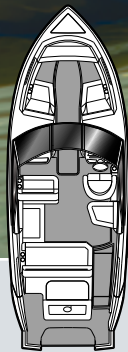

R SERIES

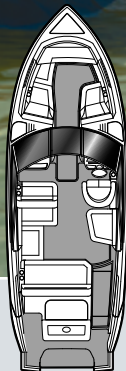

Deep-down dependability and good looks can go far, but the R Series deserves even more. These models encourage a retreat to some of life's important moments. Designed for comfort and maximized space, the R Series allows everyone aboard to stretch out and relax. And when the occasion arises to

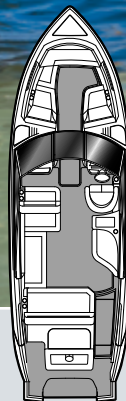

charge across the water, well this series does that too, with the smoothest of rides at finger-tip control. All in the name of timeless good taste and power of family.

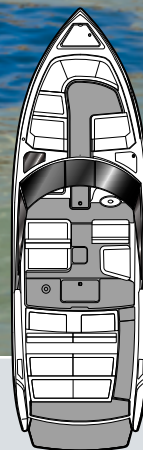

R3

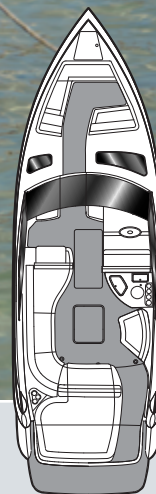

R5

R7

R30

R35

R₃

Get lost and be found.

The R3 encourages a great weekend afloat – roomy enough for your whole crew yet perfectly nimble for slipping away to a secluded beach for two. Here's an interior for deep-down relaxation in seating convertible fore and aft, a beach of a sundeck with the added bonus of a convertible lounge, and the Cobalt exclusive Swim Step ready at the water. Shown above is the Tahoe Grey interior color selection with standard snap-in carpet.

R7

Such strong feelings of pride
simply can't be contained.

Take pride in a boat for all occasions, from the activity centered swim platform to the quilt stitch detailed upholstery – the R7 has the answer to your every wish. The ideal combination of spaciousness and luxurious comfort with agility and easy control. Shown here in the Terra Brown interior color selection with the optional Seagrass floor covering.

Length Overall: 27' 6" (8.38 m) • Beam: 8' 6" (2.59 m) • Dry Weight: 5600 lbs. (2540 kg) • Capacity: Yacht Certified

R30

Big. Luxurious.
Powerful. Capable.

The Cobalt R30 is the quintessential large bowrider – big, luxurious, powerful, and capable. Offering such first-class features as a hydraulic swim platform that lowers below the water surface, a head compartment large enough to be a changing room, and massive bow seating space. Then emphasize the upscale impressions with the rich Geneva interior color selection and Seagrass flooring, shown above.

R30

**R
SERIES**

Length Overall: 30' 8" (9.35 m) • Beam: 9' 6" (2.90 m) • Dry Weight, Twin Eng.: 8800 lbs. (3992 kg) • Capacity: Yacht Certified

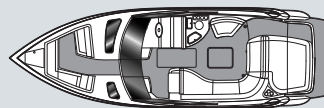

R35

Where the memories you make
last infinitely longer.

The R35 gives you the best of two boating traditions – a deep, comfortable bowrider combined with a richly appointed cuddy cabin plus a separate head compartment.

R35

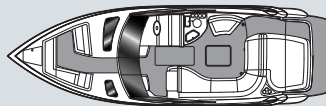

**R
SERIES**

Length Overall: 34' 9" (10.59 m) • Beam: 10' 7" (3.23 m) • Dry Weight: 12,300 lbs. (5579 kg)

The wide beam cockpit is the perfect entertaining space, complete with a galley featuring the optional microwave and drawer style refrigerator. Even the helm seat provides the extra space for the Captain and First Mate. Looking aft the swim platform lowers hydraulically, plus the added depth of an optional swim step.

SURF SERIES

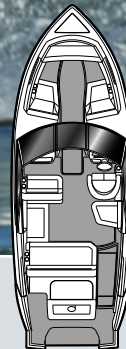

For boaters of all ages, wake surfing has become one of the most popular sports on the water. The Cobalt Surf Series create the perfect endless wave with the easy operation of the TruWave Surf System. But there's more to this story than just being great surf boats – these are Cobalts. When the surf day is done,

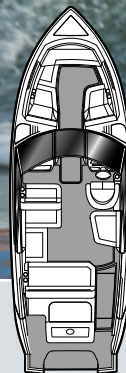

you still have all the comfort, all the precision, all of the exceptional ride of Cobalt – something no other surf boat on the market can offer. This truly is the best of both worlds, a great surf boat and the luxury of a Cobalt.

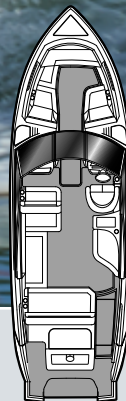

CS23 SURF

R3 SURF

R5 SURF

R7 SURF

TruWave Surf System

TruWave – Surfing Made Simple

At the touch of a button, the Cobalt TruWave computer control surf system adjusts the surf tabs to create the optimum surf wake either left or right. No need to transfer ballast load between tanks to achieve optimum surf wake. Surfing the perfect wave just takes a few simple steps, no complicated adjustments and settings are required.

- ☞ Fill the ballast tanks
- ☞ Set the speed control to your desired surf speed
- ☞ Select surf left or surf right
- ☞ Throttle up and surf

The system will automatically adjust the surf tabs to the ideal position, and control speed to your set limit, creating a cleanly defined surf wave with plenty of push.

Ballast Tanks

Multiple ballast tanks, strategically located, add weight making the boat sit lower in the water, effectively carving a larger wave. Each tank is independently equipped with its own high-flow pump for quick filling and emptying, with fill level indicators and auto shut-off.

On Plane with Full Ballast

In Performance Mode, the surf tabs automatically deploy and adjust for a quick hole-shot through to running speed, easily getting the boat on plane with full ballast. Once on plane, the tabs retract to the full up position. No need to empty tanks for a quick run at speed.

Performance of Total Trim Control

Exceptional wake surfing doesn't come at a compromise to Cobalt's softer, drier, faster ride. With the versatility of full-range power trim all the control and efficient operation remains. Drivers can at anytime adjust the trim for customized wake for surfing, wakeboarding or smooth cruising.

Volvo Penta Forward Drive

Uniquely engineered with two forward-facing counter-rotating props, which position the propellers to the front of the drive unit well under the boat, pull the boat through the water rather than pushing it. Whether wake surfing, wakeboarding or simply cruising, the Forward Drive allows boaters to enjoy endless days of fun without sacrifice. Armed with power trim and an enlarged trim plate, drivers can easily customize their wake for water sports, then level off for smooth cruising.

The Cobalt TruWave Surf System

The best aspects of boating by providing a world-class ride combined with a superior surf wake. The TruWave control system quickly and automatically tunes the boat's attitude and speed to the optimal surf configuration on either side of the boat. A wake that provides smooth transitions, a wide push zone, and a solid pop.

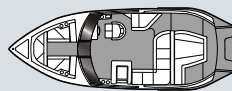

CS23_{SURF}

A lifetime
of quality time.

Wake surfing, wake boarding, tubing, or just cruising – the CS23 Surf has an activity for everyone in the family when it comes to spending quality time together. Here's a modern classic design with smooth clean lines to the hull and deck, plus a versatile seating arrangement that keeps the whole crew engaged. Shown here is the Terra Brown interior with the Seagrass flooring option.

SC
SERIES

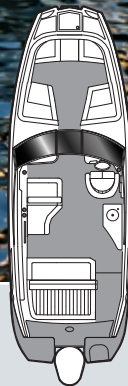

The SC Series brings the versatility and convince of outboard engines to the Cobalt line-up. But this is not as simple as things may seem – careful engineering has gone into adjustments of the hulls and running surfaces for a precise marriage of outboard power and Cobalt performance.

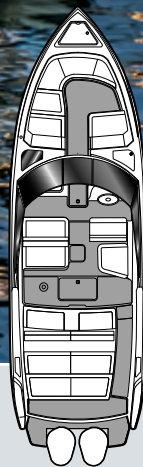

From single to twin applications in lengths for 23 to 30 footers, the range of the SC Series can accommodate a verity of boating environments. This is especially true in coastal locations where outboards have proven their advantages. Couple that with the exceptional Cobalt ride and you have the perfect combination.

Optional Features and Equipment

Your new Cobalt comes with the basics of the good life already aboard – comfort, convenience, luxury and an unmistakable sense of security. Now comes the optional equipment to help you customize your Cobalt. Go ahead, Design your Dream. For a complete list of options and standard equipment, visit our web site at CobaltBoats.com, and our Design Your Dream tool.

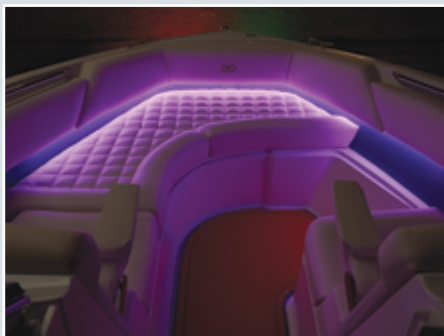

Design Your Dream online: CobaltBoats.com

Consult your Cobalt dealer as equipment and specifications are subject to change without notice.

Dinette Table - Receptacles for bow, cockpit and sunpad mounting locations.

LED Interior Accent Lighting - Equipped with RGB adjustable color settings.

Galley Unit - Replaces starboard side seat, shown in a 25SC.

Aft Walk-Thru Filler Cushions - Styles vary with the boat model. Shown in a 200S.

Bow Filler Cushions - Styles vary depending on the boat model. Shown in a 25SC.

Sof-Trac Marine Mat - For cockpit and swim step applications, color matched to interior.

Swim Step - A patented Cobalt exclusive feature, available on all models.

Hydraulic Swim Platform - Available on R30, R35, and all A Series models.

SC Series Swim Step - Installed to the starboard side of outboard engines.

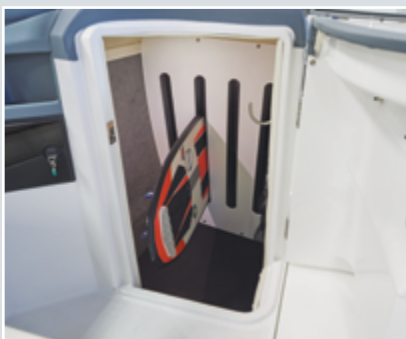

Optional Features and Equipment

Elite Board Racks - 180° rotation for easy access inside or outside the cockpit. Aluminum construction. Standard equipment on Surf models.

Triton Board Racks - Uniquely secures boards in a vertical position, 180° rotation. Available as an option in black or white finishes.

Head Surf Board Storage - Converts the head compartment into a lockable board storage.

Sunshade Surf Board Pockets - Standard equipment for the R3 Surf, R5 Surf, and R7 Surf.

Tower Speakers - Equipped with LED accent lights. Available for all towers and arches.

Consult your Cobalt dealer as equipment and specifications are subject to change without notice.

Windlass w/ Anchor - All chain from boat to anchor, operated from dash or forward hatch.

Trim Tabs - With indicators, optional Auto-Glide System available on boats 30 foot and larger.

Driver's Rear View Mirror - single tension knob for clamp and arm articulation.

Stainless Steel Flagpole - With flush mount receptacle, American flag included.

Recessed Oval Logo - One piece badge. Available in Silver, Black, Navy, Pacific Blue, or Red.

Transom Shower - convenience of a quick freshwater rinse-off

Tool Kit - Two screw drivers, pliers, adjustable wrench and mounted storage pouch.

Stainless Steel Fender Clips (w/line) - Quick and secure way to deploy fenders.

Cockpit Refrigerator - Stainless Steel pull out design. Shown in the 30SC.

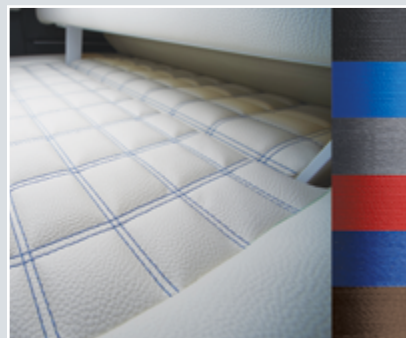

Optional Features and Equipment

Stainless Steel Foot Tread - Available for the helm station on most models.

Weighted Pillows - Resists blowing out of cockpit while underway, sets of 4 or 10.

Colored Quilted-Pattern Stitching - Black, Pacific Blue, Gray, Red, Navy, Brown

Aft Walk-Thru Gate - style and materials vary depending on model.

Bow Boarding Ladder - Heavy stainless steel three step constructions.

Port Boarding Ladder - 3 step telescoping ladder mount underneath swim platform.

Consult your Cobalt dealer as equipment and specifications are subject to change without notice.

Stainless Steel Docking Lights - Available on model up to 27 feet.

Stainless Steel Docking Lights - Available on model 30 feet and larger.

LED Under Water Lights - Adjustable RGB multi-color system.

Swim Platform Lighting - White LED illumination, long life, low power consumption.

Head Compartment Sink Console - Shown in model 23SC.

Portal Light - One in head compartment

Electric Porcelain Head - Utilizes raw water drawn from thru-hull system. Shown in 25SC

VaccuFlush Head - Utilizes water from internal freshwater system. Shown in 30SC

Porta-Potti - Available in standard portable, or pump-out configurations. Shown in R5.

Arches, Tops, and Covers

Model 30SC with the stainless steel / aluminum arch and hard top featuring the color-accented headliner.

Cobalt's selection of premium arches, tops and covers not only protect from the elements, they offer next level styling and great looks to your new boat. Arches range from aluminum tube construction with canvas biminis that easily fold down for trailering and storage, to solid structures featuring stainless steel accents and canvas sunshades or elegant hardtops.

Color-matched and custom-tailored, Cobalt bimini tops, sunshades and tonneau covers are made of a premium acrylic

marine canvas. This material is extremely strong and fade-resistant, with superior water resistance. Yet it breathes, resisting rot and mildew.

Bimini tops setup rock solid with Cobalt's easily adjustable stainless steel turn-buckle supports. Rigidity simply not found with the use of fabric straps.

Stainless Steel / Aluminum Arch with Hardtop and SureShade

Available in black or white on models R30 and 30SC. SureShade is available in a manual pull-out or electrically deployable version.

Stainless Steel Arch with Hardtop and Electric SureShade

This top with an electrically deployable SureShade is standard equipment on model R35. A color-accented headliner is optional.

Sport Tower with Pull-Out Sunshade

A permanent rigid structure with a stretched canvas top covering, and the extendable sunshade aft. Available for models 23SC and 25SC.

Arches, Tops, and Covers

Folding Aluminum Arch with Bimini Top

Available as an option in black or white on models 200S, 220s, R3, R5, R7, 23SC and 25SC. Electrically actuated or gas-assist manual folding versions.

Folding Aluminum Arch with Rotating Sunshade

Folds down while sunshade remains fixed. Available as an option in black or white on models R3, R5, R7, 23SC and 25SC. Electrically actuated or gas-assist manual folding versions.

Stainless Steel / Aluminum Arch with Sunshade

Optionally available in black or white on models R3, R5, R7, R30 and 30SC. Standard equipment on R3 Surf, R5 Surf, R7 Surf

Folding Aluminum Arch with Bimini Top (CS models)

Available as an option in black or white on models CS22 and CS23. Standard equipment on the CS23 Surf model. Gas-assist manual folding version only.

Premium Bimini Top, and optional Easy Fold

The optional Easy Fold mechanism allows a stowed bimini to be lower to a trailerable position without disconnecting any hardware.

Tonneau and Mooring Covers

Provides protection from the elements while allowing interior to breathe. To the left: Bow and Cockpit Tonneau Covers. Above: Mooring Cover.
